# I Plan ~ You Teach

Helping you live your life  
AND

be the math teacher that gets results

## Are you Ready For Help?

Click the links for Lesson Plans that align with TEXAS TEKS!

[2<sup>nd</sup> Grade Math Lesson Plans](#)

[3<sup>rd</sup> Grade Math Lesson Plans](#)

[4<sup>th</sup> Grade Math Lesson Plans](#)

[5<sup>th</sup> Grade Math Lesson Plans](#)

I SEE YOU~

- struggling each week to write lesson plans that meet the rigor of the TEKS.
- searching endlessly for resources that will help kids learn math while being challenged and engaged.
- staying late everyday after school working on plans and creating everything from scratch.

You are exhausted from working with students all day, and still have to prep, write and create.

I SEE YOU~

SACRIFICING your time with your family and friends

to ensure success for ALL of OUR Children.

Name \_\_\_\_\_

Addition and Subtraction

LT	Statement	1	2	3	4	Evidence
1	I can represent a number on a number line as being between two consecutive multiples of 10; 100; 1,000; or 10,000.					
2	I can use words to describe relative size of numbers in order to round whole numbers.					
3	I can round to the nearest 10 or 100 to estimate solutions to addition and subtraction problems.					
4	I can use compatible numbers to estimate solutions to addition and subtraction problems.					
5	I can solve with fluency one-step and two-step problems involving addition and subtraction within 1,000 using strategies based on place value.					
6	I can solve with fluency one-step and two-step problems involving addition and subtraction within 1,000 using strategies based on properties of operations.					
7	I can solve with fluency one-step and two-step problems involving addition and subtraction within 1,000 using strategies based on the relationship between addition and subtraction.					

1	2	3	4
I have no idea how to do this.	I can do this with some help.	I can do this by myself	I can teach someone to do this.

Name \_\_\_\_\_

Addition and Subtraction

LT	Statement	1	2	3	4	Evidence
8	I can represent one- and two-step problems involving addition and subtraction of whole numbers to 1,000 using pictorial models.					
9	I can represent one- and two-step problems involving addition and subtraction of whole numbers to 1,000 using number lines.					
10	I can represent one- and two-step problems involving addition and subtraction of whole numbers to 1,000 using equations.					
11	I can determine the value of a collection of coins and bills.					
12	I can determine the perimeter of a polygon					

1	2	3	4
I have no idea how to do this.	I can do this with some help.	I can do this by myself	I can teach someone to do this.

Learning Target	What do we want students to learn?	How will we know if they learned it?	What will we do if they don't?	What will we do if they already know it?
1 3.2C	Represent a number on a number line as being between two consecutive multiples of 10; 100; 1,000; or 10,000.	<input type="checkbox"/> Number lines multiples of 10 <input type="checkbox"/> Number lines multiples of 100 <input type="checkbox"/> Number lines multiples of 1,000 <input type="checkbox"/> Number lines multiples of 10,000	<input type="checkbox"/> Activities to include: identifying a point on a number line as being between two consecutive multiples. <input type="checkbox"/> Activities to include: points less than halfway between two consecutive multiples would round to the lower multiple. <input type="checkbox"/> Activities to include: points more than halfway between two consecutive multiples would round to the higher multiple.	<input type="checkbox"/> Explain how to identify a point on a number line as being between two consecutive multiples.
2 3.2C	Use words to describe relative size of numbers in order to round whole numbers.	<input type="checkbox"/> Words to know: closer to, less than halfway between, more than halfway between, halfway between, nearly, about <input type="checkbox"/> Round to the nearest 10, 100, 1,000, 10,000 on a number line	<input type="checkbox"/> Activities to include: Identifying the value of a point on a number line rounded to the nearest multiple.	

Learning Target	What do we want students to learn?	How will we know if they learned it?	What will we do if they don't?	What will we do if they already know it?
<p>3 3.4B</p>	<p>Round to the nearest 10 or 100 to estimate solutions to addition and subtraction problems.</p>	<ul style="list-style-type: none"> <li><input type="checkbox"/> Round to the nearest 10, or 100 on a number line</li> <li><input type="checkbox"/> Round numbers to a common place then compute.</li> </ul>	<p>Activities to include:</p> <ul style="list-style-type: none"> <li><input type="checkbox"/> Recognizing addition or subtraction in one- or two-step problems.</li> <li><input type="checkbox"/> Estimating numbers using rounding.</li> </ul>	<ul style="list-style-type: none"> <li><input type="checkbox"/> Round to the nearest 10, 100, or 1,000 or use compatible numbers to estimate solutions involving whole numbers.</li> </ul>
<p>4 3.4B</p>	<p>Use compatible numbers to estimate solutions to addition and subtraction problems.</p>	<p>Compatible Numbers</p> <ul style="list-style-type: none"> <li><input type="checkbox"/> Make 10 strategy</li> <li><input type="checkbox"/> Make 0 strategy</li> </ul>	<p>Activities to include:</p> <ul style="list-style-type: none"> <li><input type="checkbox"/> Addition or subtraction in one- or two-step problems.</li> <li><input type="checkbox"/> Estimating numbers using compatible numbers.</li> </ul>	

Learning Target	What do we want students to learn?	How will we know if they learned it?	What will we do if they don't?	What will we do if they already know it?
5 3.4A	Solve with fluency one-step and two-step problems involving addition and subtraction within 1,000 using strategies based on place value.	<input type="checkbox"/> One-step and two-step problems <input type="checkbox"/> Addition strategies based on place value <input type="checkbox"/> Subtraction strategies based on place value	Activities to include: <input type="checkbox"/> Addition presented in a real-world problem situation <input type="checkbox"/> Subtraction presented in a real-world problem situation <input type="checkbox"/> Two-step problems involving addition and subtraction	Add and subtract whole numbers using the standard algorithm.
6 3.4A	Solve with fluency one-step and two-step problems involving addition and subtraction within 1,000 using strategies based on properties of operations.	<input type="checkbox"/> One-step and two-step problems <input type="checkbox"/> Addition strategies based on properties of operations <input type="checkbox"/> Subtraction strategies based on properties of operations	Patterns <input type="checkbox"/> $A + B + C$ <input type="checkbox"/> $A + B - C$ <input type="checkbox"/> $A - B + C$ <input type="checkbox"/> $A - B - C$	
7 3.4A	Solve with fluency one-step and two-step problems involving addition and subtraction within 1,000 using strategies based on the relationship between addition and subtraction.	<input type="checkbox"/> One-step and two-step problems <input type="checkbox"/> Addition strategies based on the relationship between addition and subtraction <input type="checkbox"/> Subtraction strategies based on the relationship between addition and subtraction		

Learning Target	What do we want students to learn?	How will we know if they learned it?	What will we do if they don't?	What will we do if they already know it?
8 3.5A	Represent one- and two-step problems involving addition and subtraction of whole numbers to 1,000 using pictorial models.	One- and two-step Problems <ul style="list-style-type: none"> <li><input type="checkbox"/> Base-10 models</li> <li><input type="checkbox"/> Strip diagrams</li> <li><input type="checkbox"/> Unknown in any position</li> </ul>	Activities to include: <ul style="list-style-type: none"> <li><input type="checkbox"/> Addition or subtraction presented in a real-world problem situation</li> <li><input type="checkbox"/> Relationships between the word problem and a strip diagram</li> <li><input type="checkbox"/> Identify the whole, the parts, and the unknown in one- and two-step addition and subtraction situation</li> <li><input type="checkbox"/> One or two-step problem involving addition and subtraction using a strip diagram</li> </ul>	<ul style="list-style-type: none"> <li><input type="checkbox"/> Represent multi-step problems with whole numbers using strip diagrams and equations with a letter standing for the unknown quantity.</li> </ul>

Learning Target	What do we want students to learn?	How will we know if they learned it?	What will we do if they don't?	What will we do if they already know it?
<p style="text-align: center;">9 3.5A</p>	<p>Represent one- and two-step problems involving addition and subtraction of whole numbers to 1,000 using number lines.</p>	<p>One- and two-step Problems</p> <ul style="list-style-type: none"> <li><input type="checkbox"/> Unknown in any position</li> </ul> <p>Number lines</p> <ul style="list-style-type: none"> <li><input type="checkbox"/> Horizontal</li> <li><input type="checkbox"/> Vertical</li> <li><input type="checkbox"/> Open</li> <li><input type="checkbox"/> Closed</li> </ul>	<p>Activities to include:</p> <ul style="list-style-type: none"> <li><input type="checkbox"/> Addition or subtraction presented in a real-world problem situation</li> <li><input type="checkbox"/> Relationships between the word problem and a number line.</li> <li><input type="checkbox"/> Identify the minuend, the subtrahend, and the difference in a subtraction situation on a number line.</li> <li><input type="checkbox"/> Identify the addends and the sum in an addition situation on a number line</li> <li><input type="checkbox"/> Represent a one or two-step problem involving addition and subtraction using a number line</li> </ul>	<ul style="list-style-type: none"> <li><input type="checkbox"/> Represent multi-step problems with whole numbers using strip diagrams and equations with a letter standing for the unknown quantity.</li> </ul>

Learning Target	What do we want students to learn?	How will we know if they learned it?	What will we do if they don't?	What will we do if they already know it?
<p style="text-align: center;">10 3.5A</p>	<p>Represent one- and two-step problems involving addition and subtraction of whole numbers to 1,000 using equations.</p>	<p>One- and two-step Problems</p> <ul style="list-style-type: none"> <li><input type="checkbox"/> Equal sign at beginning or end</li> <li><input type="checkbox"/> Unknown in any position</li> </ul>	<ul style="list-style-type: none"> <li><input type="checkbox"/> Recognize addition or subtraction presented in a real-world problem situation</li> <li><input type="checkbox"/> Understand the relationship between the description of a problem situation and the symbols represented in an equation</li> <li><input type="checkbox"/> Understand a subtraction situation can be represented using a related fact family addition equation</li> <li><input type="checkbox"/> Represent a one or two-step problem involving subtraction using an equation</li> <li><input type="checkbox"/> <math>A + B + C</math></li> <li><input type="checkbox"/> <math>A + B - C</math></li> <li><input type="checkbox"/> <math>A - B + C</math></li> <li><input type="checkbox"/> <math>A - B - C</math></li> </ul>	<ul style="list-style-type: none"> <li><input type="checkbox"/> Represent multi-step problems with whole numbers using strip diagrams and equations with a letter standing for the unknown quantity.</li> </ul>
